

Nathaniel Sawant

Available for full-time positions starting January 2025

609-433-8636 | sawant.na@northeastern.edu | natesawant.com | linkedin.com/in/natesawant | github.com/natesawant

EDUCATION

Northeastern University, Khoury College of Computer Sciences

Boston, MA

Bachelor of Science in Computer Science, Concentration in Artificial Intelligence

Sep. 2021 – Dec. 2024

GPA: 3.71/4.00

Leadership: Northeastern U. IEEE Chapter (President, *Fall 2023*): NUHOC (VP Publicity, *Summer 2024*)

Relevant Courses: Software Engineering, Database Management Systems, Machine Learning 1 & 2, Object-Oriented Design, Algorithms & Data, C++ Programming, Natural Language Processing, Artificial Intelligence, Prob. & Stats.

Clubs: NUIEEE (Professional), NUHOC (Outdoors), NUPiC (Photography), Generate (Product Development)

PROFESSIONAL EXPERIENCE

Software Engineer

Jan. 2024 – Jun. 2024

Babel Street

Somerville, MA

- Fixed performance bottlenecks (multi-thread downloads - 50% faster, better memory usage - 20% faster, etc.)
- Made Wikidata to Mongo pipeline using ontology to categorize entities with tool to compare historical changes.
- Developed Python/Maven tool to generate license report of open source libraries used in Maven projects.

Software Data Engineer

Jan. 2023 – Jun. 2023

Fidelity Investments

Boston, MA

- Developed tool for rapid prototyping using company code with VSCode/Jupyter Lab integration.
- Leveraged the ETL process to extract/save dozens of data points for 65,000 items from multiple sites.
- Built Tableau dashboard to help visualize how 100+ databases are used when, how and by whom.

Research Assistant

Oct. 2021 – Aug. 2022

Rehabilitation Games & Extended Reality Lab

Boston, MA

- Assisted in design of database for data collection of participants' eye-tracking captured at 100Hz.
- Implemented multiplayer gameplay mechanics using Unity 3D engine, OpenXR, and Photon Unity Networking.

EXTRACURRICULAR EXPERIENCE

Project Lead (DevDB, Snapper)

May. 2024 – Present

Generate Product Development at Northeastern University

Boston, MA

- Organized and worked along side a small Agile team to meet milestones and to demo the projects.
- Project 1: Designed system design for a development database platform utilizing AWS and PostgreSQL.
- Project 2: Collaborated with co-leads/client to develop high-level requirements & planning for client's project.

Software Engineer (Voxeti, Tubender)

Sep. 2023 – Apr. 2024

Generate Product Development at Northeastern University

Boston, MA

- Project 1: Designed REST APIs using MongoDB and Golang API framework along with unit tests.
- Project 2: Implemented frontend onboarding and settings page for C++ backend using React & Electron

PROJECTS

Gear Rental Site | *TypeScript, Postgres, Prisma, Next.js, tRPC, NextAuth.js*

Apr. 2024

- Led design and development for gear rental website used for club with 150+ members.
- Created frontend design with Figma with shared consistent design (fonts, components, palette, etc.)
- Implemented gear rental system with gear item checkout/return, SSO authentication and reminders.

Reinforcement Learning Agent | *PyTorch, Unity, C#*

Mar. 2023

- Trained and tested reinforcement learning agent that seeks target in unknown continuous environment.
- Integrated model with Unity for training and testing in virtual randomly generated maze environment.

TECHNICAL SKILLS

Languages: Python, Java, C#, Golang, C++, SQL, Java/TypeScript, HTML/CSS

Frameworks: React, Next.js, Unity, JUnit, FastAPI, Express

Developer Tools: Git, Docker, AWS (S3, EC2, SageMaker), NoSQL (MongoDB)

Libraries: pandas, NumPy, Matplotlib, Scikit-learn
